ART 10 – RACE START PROCEDURE

- 10.1 All races shall have rolling starts, with a side-by-side (2 X 2 in line) grid.
- 10.2 The pit lane will open at the time of showing of the ten-minute board, signalling the start of the countdown procedure and close at the showing of the five-minute board or 60 seconds after the last car leaves the pit lane, whichever is sooner. The cars will leave the pits to cover a single reconnaissance lap around the circuit to the grid. At the end of this lap they will stop on the grid in starting order with their engines stopped. A car that has entered the grid may only leave it before the one-minute board, being pushed by team technical staff and/or officials into the pit lane with the engine stopped. After the one-minute board is shown, any car on the grid must remain in its grid position until the green flag is shown, at which point they must vacate their grid position or be pushed off the grid under the instructions of the officials.
- 10.3 Any car which enters the pits after a reconnaissance lap or which is still in the pits after the five-minute board has been shown may start from the pits, but only under the direction of the MGTT race director. Cars may be moved to the pit exit only with the relevant driver seated in the cockpit with belts attached. The order at pit exit will be that in which the cars are received by the pit-lane officials. It is forbidden to change tyres on any car positioned in the fast lane of the pits or waiting at the pit exit. Cars will join the race when the whole field has passed the pit exit on the first racing lap.
- 10.4 The approach of the start will be announced by signalling boards and/or aural signals at ten minutes, five minutes, three minutes, two minutes, one minute and thirty seconds before the start of the formation lap. Specific meanings:

- b) Three-minute board: with the exception of officials, MHR and team technical staff, all others must leave the grid;
- c) Two-minute board: engines must be started by the driver in the car before the showing of the one-minute board. If a driver is unable to start their engine, they must signal it and seek permission from the MGTT race director for his team technical staff to either push start the car or to be pushed out of the grid;
- d) One-minute board: any work being undertaken on the car must cease and the team technical staff must leave the grid at this point and either exit the track or be in a safe position outside the track limits. Any push start authorised by the MGTT race director must take place as soon as the one-minute board is shown.
- e) 30-seconds board: any authorised push starts must have taken place and relevant team technical staff must have either exited the track or be in a safe position outside the track limits;
- f) Green flag: will be shown at the front of the grid, whereupon the cars will begin a formation lap behind either an official car or the Safety Car (acting as the official car), maintaining their starting order with the pole position driver leading. An intervention vehicle will follow the grid.
- 10.5 Drivers must maintain no more than five car lengths from the car in front of them once they have reached a nominated turn that will be notified in the Briefing Notes. At the end of the last formation lap, the official car will withdraw into the pit lane and at that moment, the car in pole position must maintain the same speed and the other cars their grid position. The starting signal will be given by means of lights.
- 10.6 When the start signal is given by the green lights replacing the red lights cars may accelerate into the "YELLOW START PROCEDURE".
- 10.7 YELLOW START PROCEDURE**
- 10.7.1 When the green lights are illuminated the "Yellow Race Start" procedure will begin with the 2nd (second) place car falling behind the 1st (first) car in single file before the first corner and each following car falling in line accordingly.
- 10.7.2 Under the "Yellow Race Start" procedure, there will be no overtaking until a nominated turn and/or marshal post where a green flag or light board will be shown. Cars must circulate in single file until each individual car is perpendicular to the green flag or light board. The procedure with nominated turn and/or marshal post will be confirmed in the Briefing Notes and at the Drivers Briefing.
- 10.8 At the end of the formation lap, if the conditions so require, the MGTT race director will order the official car to carry out one or more additional formation laps. Should such an additional formation lap be carried out, the start of the race and race time will be considered to have been given at the end of the first formation lap.

Masters GT Trophy

2025 TECHNICAL AND SPORTING REGULATIONS

10.9 If a problem arises when the cars approach the lights at the end of the formation lap the red lights will stay illuminated (no green lights). Cars should return to the grid at reduced speed and await instructions from the MGTT race director.

10.10 STARTING A RACE BEHIND AN ACTIVATED SAFETY CAR

10.10.1 In exceptional circumstances, the race may be started behind the Safety Car - Appendix H, Article 2.10.18 of the Code.

10.10.2 In this case at any time before the one-minute signal the Safety Car's orange lights will be turned on. This is the signal to all drivers and teams that the race will be started behind an active Safety Car.

10.10.3 When the green lights on the gantry are illuminated the safety car will leave the grid with all cars following in single file in grid order no more than 5 car lengths apart.

10.10.4 There will be no formation lap and the race will start at the illumination of the green lights.

10.10.5 Overtaking under a Safety Car start is only permitted if:

- a) A car is delayed leaving the grid and the cars behind cannot avoid passing it without unduly delaying the remainder of the field;
- b) There is more than one car starting from the pit lane and one of them is unduly delayed.

In either case a) and b), overtaking under a Safety Car start is only allowed to re-establish the original starting order.

Any car that pits before pit window during a safety car deployment and does not return to the pit lane to complete a mandatory pit stop before the pit window closes will be penalised 1 race lap.

11.4 The pit stop duration is timed and monitored from when the car registers at the Pit In timing line until the car registers at the Pit Out timing line. The car must register at the Pit In line during the period of the notified pit stop window.

11.5 During the mandatory pit stop the car must remain stationary for a single period of not less than sixty (60) seconds duration.

11.6 Engines may remain running if no driver change takes place. In the event of a driver change taking place, engines must be stopped before the driver exits the car and can only be restarted with the new driver seated in the car with the belts fastened.
